Hi Priya and Suraj,

You two are wonderful people to deal with and have made our life a whole lot easier.

After all of the ongoing problems that we have had to contend with over the last five years with web site designers my complaint list would not fit this page.

When Netable approached me I had had enough of web designers, what Priya and yourself said you could offer me I doubted and was truly sceptical.

Well since you redesigned our web site we have had at least a 30% increase in enquiries, our web site has been absolutely trouble free, and your communication and back up service I must say is second to none.

One of the very pleasing comments I get from our customers is the great layout and ease of navigating our pages, we are getting enquiries from countries that I had forgotten existed.

Suraj if you want to use this letter feel free, as far as your set up fees go it has been a small price to pay for such a good return,

Joy and my self thank you very much for not just your professional service but the great friendship we have since formed.

Kind Regards

Rex Francis.
